

## Environmental Policy

Kimberley Green Constructions acknowledges the necessity of adapting to diverse environments and social contexts. We understand the significance of incorporating environmental management practices into our business operations.

Our environmental policy is designed to mitigate any negative effects on the environment stemming from our activities. We are committed to minimizing our ecological footprint and fostering sustainability in every aspect of our business. Through proactive measures and continuous improvement, we aim to uphold our responsibility towards the environment while achieving our business objectives.

*We are undertaking the following practices to minimise our environmental impact:*

- Comply with contract conditions, relevant legislation, and other criteria to which the company subscribes.
- Regularly review business operations, identify, and implement opportunities for improvement.
- Educate our workforce on key environmental issues, management controls and associated responsibilities.
- Establish defined environmental initiatives to measure our performance and identify opportunities for improvement.
- Strive to prevent pollution, reduce waste, and commit to recovery and recycling where feasible and available.
- Develop site-specific Environmental Management plan where required.
- Engaging with suppliers and partners who share our environmental values

Noelene Green  
Director
