

Quality Policy

At Kimberley Green Constructions, our Quality Policy is a testament to our unwavering commitment to excellence in all aspects of our operations. We strive to deliver superior services and products that exceed the expectations of our clients. Central to our approach is a dedication to continuous improvement and adherence to the highest standards of quality control. Our Quality Policy serves as a guiding principle for all employees, ensuring that every project we undertake reflects our steadfast commitment to quality and client satisfaction.

At Kimberley Green Constructions, we are dedicated to delivering excellence in every aspect of our construction projects. Our commitment to quality is unwavering, and we strive to exceed client expectations through meticulous attention to detail, adherence to industry standards, and continuous improvement. We ensure the highest level of craftsmanship, safety, and environmental responsibility in all our endeavors. Our Quality Policy serves as the foundation of our operations, driving us to achieve superior results and client satisfaction on every project

To ensure compliance with our Quality Policy, the following practices are in place:

- Ensure that any identified critical points during construction are assessed to determine their compliance with the Quality Standard through regular inspection and testing. Such testing shall be documented, and corrective actions initiated where required.
- Ensure that all workers and contractors are advised of this policy and are encouraged to raise any issues regarding quality management.
- All incidents that have a potential to impact on the quality of the final product must be reported to Kimberley Green Constructions immediately.
- To assist in the reporting process, Corrective Action, Variation Orders and Rectification Notices should be completed and passed to the Project Manager or nominated supervisors for all incidents on site, including quality issues. These forms are available in the Site Safety Management Plan.
